Year 4 Lightbox Components

Dear Parents/Carers,

As part of our final Design and Technology unit, the children have been planning and designing their own light boxes. These will involve making a frame from wood, covering and decorating their box and including a simple circuit.

To ensure the children have the opportunity to take their working light box home, we have purchased new electrical components in addition to our existing school electricity resources. Therefore, we would be grateful if you would be happy to make a small contribution of **£2.22** to purchase the circuit resources (blub, bulb holder, battery, battery holder, wires). This will be payable by **Wednesday 15th July 26** via your Wisepay account.

If you would prefer not to make this contribution, the electrical components will be removed and kept in school to be used again.

Thank you in advance for your support.
The Year 4 team
