

## iPad parental control settings Primary Age Recommendations

From new, your iPad is set to allow all content and any changes to take place, this is useful and essential for adult setup and use.

If you allow your child to play with your iPad, particularly unsupervised, please bear in mind the following content that will be available to them. It can be changed easily.

To enable restrictions simply go to SETTINGS/GENERAL/RESTRICTIONS. If used for the first time you will need to enter a passcode. You can always change a setting back for your own use but remember to change them back again if children are using your iPad.

iPad restrictions available on new iPads on iOS , most are not enabled by default.	Recommendations for primary age children, but your judgement is also required.
<p>Safari (<i>internet</i>)</p> <p>Camera</p> <p>Face Time (<i>allows face to face video conversations with others</i>)</p> <p>iTunes (<i>allows buying and downloading music/books /films/games etc</i>)</p> <p>iBookstore (<i>which also has access to explicit books</i>)</p> <p>Installing Apps (<i>which might not be suitable or allow further in app purchasing</i>)</p> <p>Deleting Apps (<i>which might get rid of ones you need</i>)</p> <p>Siri (<i>voice search which is not always reliable</i>)</p> <p>Explicit Language</p> <p>You can enable ratings for various countries (<i>obvious choice is the United Kingdom</i>)</p> <p>Music and Podcasts is set by default to explicit</p> <p>Movies are set by default to all certificates up to and over 18</p> <p>TV shows are set to all (<i>including all post watershed programs and films on iplayer etc</i>)</p> <p>Books are set by default to explicit sexual content</p> <p>Apps are set to 17+ apps (<i>violent/sexual</i>)</p> <p>In app purchases is set to on (<i>allowing inadvertent purchase of everything from virtual animals to virtual money to upgrade cars etc.</i>)</p> <p>Require password means that you can choose how long between purchasing apps you can go without entering your password again.</p> <p>Location services let your position be known, essential for mapping etc.</p> <p>Contacts are set to allow changes</p> <p>Calendars are set to allow changes</p> <p>Reminders are set to allow changes</p> <p>Photos are set to allow changes</p> <p>Bluetooth sharing is allowed by default</p> <p>Twitter and Facebook are both allowed changes</p> <p>Accounts can be changed so someone can log in under another account</p> <p>Multiplayer games are allowed</p> <p>Adding friends is set to be allowed</p>	<p>Fine with supervision</p> <p>Little problem</p> <p>Problems if they have unknown contacts</p> <p>Disable</p> <p>Disable</p> <p>Disable, you can use iTunes sync on your computer or simply unlock for yourself</p> <p>Disable</p> <p>Little problem</p> <p>Disable</p> <p>Choose U.K.</p> <p>Disable</p> <p>Set to U or PG according to feelings</p> <p>Caution setting though with supervision</p> <p>Disable</p> <p>4+ or 9+ depending on your judgement</p> <p>Disable</p> <p>Immediately is safest to avoid problems, 15 minutes sometimes allows inadvertent or unwise purchases.</p> <p>Most are innocent and allow photos to be used across applications etc. but check.</p> <p>Disable to prevent addition of unknown contacts</p> <p>Disable to prevent loss of critical events.</p> <p>Disable</p> <p>Disable if you don't want photos deleted.</p> <p>Disable to prevent others accessing your data.</p> <p>Disable</p> <p>Disable</p> <p>Disable</p> <p>Disable</p>
